

Sanquo

Terms of Service & Business Policies

Effective Date: 30 April 2026 | Version 1.0

Section 5: Privacy Note

Sanquo is committed to the responsible, transparent, and lawful handling of every customer's personal data. This Privacy Note explains what information Sanquo collects, why it is collected, how it is used, with whom it may be shared, and the rights that every user holds over their own data. This Section is drafted in compliance with applicable Vietnamese data protection legislation, including the Law on Cybersecurity 2018 and Decree 13/2023/ND-CP on Personal Data Protection, and reflects internationally recognised privacy principles including those embodied in the General Data Protection Regulation (GDPR). Customers are encouraged to read this Section carefully and to direct any questions to privacy@Sanquo.vn.

5.1 Information Collection

Sanquo collects personal data through a combination of information provided directly by the user, information generated automatically through the user's interaction with the Platform, and information derived from third-party sources where applicable. The categories of data collected are as follows.

- **Identity Data:** Full name, date of birth, and gender, collected at the point of account registration.
- **Contact Data:** Email address, phone number, and delivery address or addresses, including billing address where different from the nominated delivery address.
- **Account Credentials:** Encrypted password and associated account security settings. Sanquo does not store passwords in plain text under any circumstances.
- **Transaction Data:** Order history, items purchased, payment method used (card type and last four digits only, never full card numbers), order values, and transaction timestamps.

- **Device and Technical Data:** IP address, browser type and version, operating system, device identifier, and screen resolution, collected automatically when the user accesses the Platform.
- **Usage and Behavioural Data:** Pages visited, products viewed, search queries entered, time spent on product pages, items added to cart or wishlist, and click-through patterns across the Platform.
- **Communications Data:** Records of customer support interactions, including live chat logs, email correspondence, and call notes, retained for service quality assurance and dispute resolution purposes.
- **User-Generated Content:** Product reviews, ratings, and profile images voluntarily submitted by the user to the Platform.
- **Location Data:** Approximate geographic location derived from IP address. Precise GPS location data is collected only where the user explicitly grants permission through their device settings.
- **Marketing Preference Data:** Records of the user's opt-in or opt-out status for promotional communications, together with engagement data such as email open rates and click-through rates, where applicable.

Sanquo collects only the data that is necessary for the purposes described in this Section. Users are not required to provide data beyond what is essential for account creation and order fulfilment, though certain optional data — such as saved addresses and marketing preferences — enhances the platform experience when provided.

5.2 Use of Data

Personal data collected by Sanquo is used exclusively for the purposes set out below. No data is used for purposes incompatible with those disclosed at the time of collection without the user's prior consent.

- **Order Fulfilment:** Name, contact details, and delivery address are used to process, dispatch, and deliver orders, and to communicate order status updates throughout the fulfilment journey.
- **Payment Processing:** Transaction data is shared with payment processors solely for the purpose of authorising and completing financial transactions, in accordance with Section 5.3.
- **Account Management:** Identity and contact data are used to maintain the user's account, authenticate login sessions, and enable secure account recovery.

- **Customer Support:** Communications data and transaction history are used to resolve customer queries, process returns, and manage disputes efficiently and accurately.
- **Platform Personalisation:** Behavioural and usage data are used to personalise the shopping experience, including product recommendations, curated homepage content, and relevant search results, based on the user's demonstrated preferences and browsing behaviour.
- **Marketing and Promotional Communications:** Where the user has opted in, contact data and marketing preference data are used to send promotional emails, SMS notifications, and in-app messages regarding new arrivals, offers, and platform updates. Users may withdraw consent for marketing communications at any time, without affecting the lawfulness of prior processing.
- **Platform Improvement and Analytics:** Aggregated and anonymised usage data are analysed to identify performance issues, improve navigation and user experience, and inform ongoing product development and merchandising decisions.
- **Fraud Prevention and Security:** Device, technical, and behavioural data are utilised by Sanquo's fraud detection systems to identify, prevent, and respond to unauthorised transactions, account compromises, and violations of platform policy.
- **Legal Compliance:** Personal data is processed and retained to the extent required to comply with applicable Vietnamese law, including obligations arising under tax, accounting, and consumer protection legislation.

5.3 Data Sharing with Third Parties

Sanquo does not sell, rent, or trade personal data to any third party for independent commercial purposes. All data sharing is limited to the operational contexts and legal obligations described below, and all third-party recipients of personal data are subject to contractual or regulatory obligations that restrict their use of that data.

- **Logistics and Delivery Partners:** The customer's name, phone number, and delivery address are shared with Sanquo's contracted logistics and delivery partners solely for the purpose of fulfilling and tracking orders. Delivery partners are contractually prohibited from using this data for any purpose beyond order execution.
- **Payment Processors and Financial Institutions:** Transaction data is shared with payment processors — including card networks, e-wallet providers, and banking partners — to the minimum extent necessary to authorise and settle transactions. Sanquo does not share full card numbers or CVV data with any third party; tokenised references are used wherever technically feasible.

- **Technology and Infrastructure Providers:** Sanquo's cloud hosting, data storage, and platform analytics providers may process personal data on Sanquo's behalf in their capacity as data processors. All such providers are bound by data processing agreements that prohibit independent use of the data and require adherence to applicable privacy and security standards.
- **Marketing and Retargeting Platforms:** Where users have opted in to marketing communications, or where Sanquo operates retargeting programmes, certain data — including hashed email addresses and pseudonymised browsing identifiers — may be shared with advertising platforms including Google Ads and Meta (Facebook and Instagram) for the purpose of delivering relevant promotional content and retargeted advertisements to users across those platforms. Sanquo uses privacy-preserving data sharing mechanisms, such as hashing and audience matching, and does not share personally identifiable information such as full names or phone numbers with these platforms for advertising purposes. Users may opt out of retargeting at any time through the Platform's cookie and privacy settings, or directly through the ad platform's opt-out mechanisms.
- **Legal and Regulatory Disclosure:** Personal data may be disclosed to Vietnamese law enforcement agencies, regulatory authorities, or courts where Sanquo is required to do so by applicable law, valid court order, or legitimate regulatory demand. Sanquo will endeavour to notify affected users of such disclosure to the fullest extent permitted by law.
- **Business Transfers:** In the event of a merger, acquisition, restructuring, or sale of all or part of Sanquo's business, personal data held by Sanquo may be transferred to the successor entity as part of that transaction. Users will be notified of any such transfer in advance, and the successor entity will be required to honour the privacy commitments set out in this policy.

Sanquo reviews its third-party data sharing arrangements on a regular basis to ensure that they remain necessary, proportionate, and consistent with this Privacy Note. Customers who have concerns about any specific data sharing arrangement are welcome to contact privacy@Sanquo.vn for further information.

5.4 Cookies and Tracking

Cookies are small text files placed on the user's device when they visit the Sanquo Platform. They enable the Platform to recognise the user's device across sessions, retain preferences, and deliver a more consistent, responsive, and personalised shopping experience. Sanquo uses four categories of cookies, each serving a distinct and defined purpose.

- **Strictly Necessary Cookies:** These cookies are essential to the basic operation of the Platform and cannot be disabled without impairing core functionality. They enable functions including login session management, shopping cart persistence, and security token validation. No consent is required for these cookies, as they are technically indispensable.
- **Functional Cookies:** These cookies retain user preferences — such as language settings, previously applied filters, and saved delivery addresses — to reduce repetitive data entry and provide a more coherent experience across browsing sessions.
- **Analytics Cookies:** These cookies collect anonymised data on how users navigate the Platform, including pages visited, time spent on site, and exit behaviour, enabling Sanquo to understand usage patterns and improve the customer experience on an ongoing basis. Analytics data is aggregated and is not linked to individual user identities.
- **Marketing and Personalisation Cookies:** These cookies are used to deliver personalised product recommendations and, in conjunction with Sanquo's retargeting programmes on platforms such as Google and Meta, to serve relevant promotional content to users who have previously visited the Platform. These cookies may track activity across multiple sessions to build an anonymised preference profile. Users may opt out of marketing and personalisation cookies at any time without affecting core Platform functionality.
- **Third-Party Cookies:** Certain Platform features — such as embedded social sharing functionality or third-party analytics integrations — may set cookies originating from third-party domains. Sanquo does not control these cookies and recommends that users review the privacy and cookie policies of the relevant third parties directly.

Upon the user's first visit to the Platform, a cookie consent banner is displayed, explaining the categories of cookies in use and providing the option to accept all cookies, reject non-essential cookies, or configure preferences by category. Cookie preferences may be updated at any time through the Privacy Settings section of the Platform. Where a user declines non-essential cookies, their choice will be respected immediately and maintained across subsequent sessions.

5.5 User Rights

Sanquo recognises that personal data belongs to the individual, and is committed to upholding the full scope of data rights to which users are entitled under applicable

Vietnamese law and internationally recognised privacy principles. The following rights are available to all Sanquo users.

- **The Right to Access:** Users may request a copy of the personal data that Sanquo holds about them at any time. Sanquo will respond to access requests within thirty (30) calendar days of receipt.
- **The Right to Rectification:** Users may request the correction of any inaccurate or incomplete personal data, either directly through their account settings or by contacting Sanquo's support team. Corrections will be actioned promptly upon verification.
- **The Right to Erasure:** Users may request the deletion of their personal data. Sanquo will comply to the fullest extent permitted by law. Where certain data must be retained to fulfil legal obligations under Vietnamese law — such as transaction records required for tax compliance — Sanquo will inform the user of the specific data retained, the legal basis for its retention, and the applicable retention period.
- **The Right to Withdraw Consent:** Where data processing is based on the user's consent — such as for marketing communications or personalisation cookies — users may withdraw that consent at any time. Withdrawal does not affect the lawfulness of any processing that occurred prior to the withdrawal.
- **The Right to Data Portability:** Users may request that their personal data be provided in a structured, commonly used, and machine-readable format, to the extent that this is technically feasible and consistent with applicable law.
- **The Right to Object:** Users may object to the processing of their personal data for direct marketing purposes at any time. Upon receipt of a valid objection, Sanquo will cease all direct marketing processing in relation to that user immediately and without condition.
- **The Right to Lodge a Complaint:** Users who believe that their data rights have been violated, or that Sanquo has processed their personal data in a manner inconsistent with this Privacy Note or applicable law, are entitled to lodge a formal complaint with the relevant Vietnamese data protection authority or consumer protection body.

All data rights requests should be submitted in writing to privacy@Sanquo.vn. Sanquo will acknowledge receipt of every request within two (2) business days and will respond substantively within thirty (30) calendar days. Where a request is of a complex or voluminous nature, the response period may be extended by a further thirty (30) calendar days; the user

will be notified of any such extension, together with the reasons for it, within the initial thirty-day window.

Sanquo is committed to reviewing and updating this Privacy Note periodically to reflect changes in applicable law, platform operations, and industry best practice. The effective date at the top of this document reflects the date of the most recent revision. Users are encouraged to review this Section regularly. Continued use of the Platform following any update constitutes acceptance of the revised Privacy Note.
