

Sanquo

Terms of Service & Business Policies

Effective Date: 30 April 2026 | Version 1.0

Section 7: Technical and Device Issues

Sanquo is committed to delivering a stable, responsive, and technically reliable platform experience. This Section sets out the system requirements for optimal Platform performance, the procedures governing scheduled and emergency maintenance, practical troubleshooting guidance for the most common technical issues encountered by customers, and the scope of Sanquo's liability in relation to device-side and connectivity-related disruptions.

7.1 System Requirements

To ensure the best possible experience on the Sanquo Platform — whether accessed via web browser or the Sanquo mobile application — customers' devices should meet the following technical specifications. Using unsupported browsers, operating systems, or devices may result in degraded performance, visual rendering issues, or limited access to certain Platform features.

Supported Web Browsers

- **Google Chrome:** Version 90 and above (recommended).
- **Mozilla Firefox:** Version 88 and above.
- **Microsoft Edge:** Version 90 and above.
- **Safari:** Version 14 and above (macOS and iOS).

Internet Explorer is not supported in any version. Customers using Internet Explorer will not be able to access the Sanquo Platform and are advised to switch to a supported browser.

Desktop Operating Systems

- **Windows:** Windows 10 and above. Older versions of Windows may experience degraded performance or limited feature compatibility.
- **macOS:** macOS 11 (Big Sur) and above.

Mobile Operating Systems and Application

- **iOS:** iOS 14 and above. The Sanquo mobile application is available for download on the Apple App Store.
- **Android:** Android 9.0 (Pie) and above. The Sanquo mobile application is available for download on the Google Play Store.

The Sanquo mobile application is optimised for smartphones. Functionality on tablet devices may vary. Customers using mobile browsers are fully supported on Chrome for Android and Safari for iOS; other mobile browsers may operate but are not officially tested or guaranteed.

Connectivity and Browser Settings

- **Internet Speed:** A stable connection of at least 5 Mbps is recommended for smooth browsing and checkout. High-resolution product imagery, video content, and live Platform features may require higher bandwidth.
- **Screen Resolution:** A minimum resolution of 1280 x 720 pixels is recommended for the desktop interface. The Platform is fully responsive across mobile screen sizes; screens narrower than 320 pixels may not render all interface elements optimally.

Sanquo strongly recommends keeping browsers, operating systems, and the Sanquo mobile application updated to their latest stable versions. Updates frequently include security patches and compatibility improvements that directly benefit Platform performance.

7.2 Scheduled Maintenance

Sanquo conducts periodic scheduled maintenance on its Platform infrastructure to ensure the continued stability, security, and performance of its services. These maintenance windows are a planned and essential component of responsible platform operations, and Sanquo appreciates the patience and understanding of its customers during these periods.

Wherever operationally possible, maintenance is scheduled during off-peak hours — typically between 1:00 AM and 5:00 AM (Vietnamese Time, UTC+7) on weekday mornings — to minimise disruption to the customer experience. Sanquo commits to restoring full Platform functionality as promptly as possible within each scheduled window, and will communicate an estimated duration where one can be reliably projected.

Advance notice of scheduled maintenance will be communicated through the following channels, at least twenty-four (24) hours prior to the commencement of the maintenance window wherever practicable: a prominent notice banner displayed on the Platform; an email notification sent to all registered users; and an in-app announcement within the Sanquo

mobile application. During a maintenance window, the Platform — or specific features such as checkout, account login, or order tracking — may be temporarily unavailable or operating in a reduced-functionality mode.

In circumstances where emergency maintenance is required to address a critical security vulnerability or an acute system failure, Sanquo may need to act without advance notice. In such cases, customers will be notified of the situation as promptly as practicable, and the maintenance period will be kept as brief as the technical circumstances allow. Sanquo will publish a post-maintenance summary where the disruption was significant.

Customers can be assured that orders placed and payments processed in the period immediately preceding a maintenance window will be safeguarded. In the event that a transaction is interrupted by an unplanned outage or emergency maintenance action, Sanquo will investigate each case individually and ensure that no customer is charged for a failed transaction or left without order confirmation as a result of a Platform-side disruption.

7.3 Common Technical Glitches

The following troubleshooting guidance addresses the most frequently encountered technical issues on the Sanquo Platform. Customers are encouraged to work through the steps in sequence before contacting support, as most common issues can be resolved independently within a few minutes.

Issue 1: App Freezing or Crashing

1. Close the Sanquo application completely — ensuring it is removed from background processes — and relaunch it.
2. Check for available application updates in the Apple App Store or Google Play Store and install the latest version of the Sanquo app.
3. Restart the device and reopen the application.
4. If the issue persists, uninstall the Sanquo application and perform a clean reinstall from the relevant app store.
5. If the problem continues following reinstallation, please contact Sanquo's support team with details of your device model and operating system version.

Issue 2: Payment Errors at Checkout

1. Verify that all payment details entered are accurate — including card number, expiry date, and CVV — and confirm that the card or e-wallet account holds sufficient funds.
2. Confirm with the issuing bank or e-wallet provider that the payment instrument is enabled for online transactions and, where applicable, for e-commerce purchases.
3. Attempt the transaction using an alternative payment method available on the Platform.

4. Clear the browser cache and cookies, reload the checkout page, and retry the payment.
5. If the error persists, note the error code or message displayed on screen and contact Sanquo's dedicated payment support team at payments@Sanquo.vn, providing the error details and your order reference.

Issue 3: Unable to Log In to Account

1. Confirm that the email address and password entered are correct, taking care to check for capitalisation, spacing, or auto-correct errors.
2. Use the "Forgot Password" function on the login page to initiate a password reset. A reset link will be sent to the registered email address.
3. Check recent communications from Sanquo to determine whether the account may have been suspended or flagged for verification.
4. Clear the browser cache and cookies, or attempt login using a different browser or device.
5. If access cannot be restored through the above steps, contact Sanquo's support team with the registered email address for identity verification and manual account recovery.

Issue 4: Pages Not Loading or Loading Slowly

1. Check the internet connection speed and stability; consider switching between Wi-Fi and mobile data to isolate the issue.
2. Refresh the page and clear the browser cache, then attempt to reload.
3. Try accessing the Platform on a different browser or device to determine whether the issue is browser-specific.
4. Check Sanquo's official social media channels or Platform status page for any announcements regarding known outages or degraded performance.
5. If the issue persists consistently across multiple devices and internet connections, it may be a Platform-side issue — please contact Sanquo's support team to report it.

Issue 5: Order Not Appearing in Account After Payment

1. Wait five (5) minutes and refresh the "My Orders" page; order confirmation may take a brief period to process and appear.
2. Check the registered email inbox — including spam and junk folders — for an automated order confirmation email from Sanquo.
3. If payment has been deducted from the account but no order confirmation appears after thirty (30) minutes, contact Sanquo's payment support team immediately at payments@Sanquo.vn, providing the transaction reference number or bank statement entry for investigation.

Issue 6: Product Images Not Displaying

1. Refresh the page and allow it to fully reload before assessing whether images are absent.

2. Temporarily disable any browser extensions, content blockers, or ad-blocking tools that may be preventing image assets from loading.
3. Clear the browser cache and reload the page.
4. Try accessing the product page on a different browser or device. If images load correctly on an alternative device, the issue is likely browser or extension-related.
5. If images fail to load consistently across all browsers and devices, the issue may originate on Sanquo's end. Please contact support and provide details of the affected product pages.

If a technical issue is not addressed by the guidance above, customers are encouraged to contact Sanquo's support team at support@Sanquo.vn or via live chat on the Platform. When reporting a technical issue, please include your device type, operating system version, browser name and version, and a brief description of the issue — including any error messages displayed. This information enables the support team to investigate and resolve the matter as efficiently as possible.

7.4 Liability Disclaimer

Sanquo takes all reasonable steps to maintain a stable, available, and technically sound Platform. However, the inherent nature of internet-based services means that absolute continuity and error-free performance cannot be guaranteed at all times. The following disclaimers govern Sanquo's liability in relation to technical and device-related disruptions.

Sanquo makes no warranty, express or implied, that the Platform will be continuously available, entirely free from errors, or free from viruses or other harmful components. While Sanquo employs industry-standard measures to maintain Platform integrity and uptime, service interruptions may occur due to factors within and outside Sanquo's control.

Sanquo shall not be liable for any loss, damage, inconvenience, or financial impact — including but not limited to loss of data, missed purchases, or failed transactions — arising from the following circumstances attributable to the user's own equipment or connectivity: the customer's device being incompatible with the Platform's stated system requirements; the customer's internet connection being unstable, slow, or interrupted during use of the Platform; software conflicts on the customer's device, including the interference of antivirus programmes, browser extensions, firewall settings, or operating system configurations with Platform functionality.

Sanquo shall not be liable for service disruptions arising from circumstances beyond its reasonable control, including but not limited to: failures of third-party infrastructure upon which Sanquo's Platform depends, including cloud hosting providers, internet service

providers, and telecommunications networks; natural disasters, power outages, civil unrest, or other force majeure events; and cyberattacks, distributed denial-of-service (DDoS) attacks, or other malicious external actions targeting Sanquo's systems.

Where a service disruption or technical error originating on Sanquo's end results in a verifiable and direct financial impact on the customer — such as a duplicate charge, a payment deducted without a corresponding order, or a failed transaction where funds were committed — Sanquo will investigate the matter promptly and provide an appropriate financial remedy in accordance with its Payment Policy as set out in Section 3.

Customers access and use the Sanquo Platform at their own risk with respect to the performance and compatibility of their personal devices, software, and internet connections. Technical support guidance provided by Sanquo — including the troubleshooting steps set out in Section 7.3 — is offered as a courtesy service and does not constitute an assumption of liability for issues arising from the customer's device or network environment.

Nothing in this Section 7.4 limits or excludes Sanquo's liability for fraud or fraudulent misrepresentation, for wilful misconduct or gross negligence on the part of Sanquo, for death or personal injury caused by Sanquo's negligence, or for any other category of liability that cannot lawfully be excluded or limited under applicable Vietnamese law.
