

Technical & Device Issues Support

At My Shop, we are committed to ensuring that your shopping experience is smooth and enjoyable across all devices. Occasionally, you may encounter technical or device-related issues while browsing or using our services. This guide provides solutions to common problems and helps you troubleshoot issues efficiently.

If you notice that the website or app is not functioning correctly—such as pages failing to load, buttons not responding, or error messages appearing—first check your internet connection to ensure your device is connected to a stable Wi-Fi or mobile network. Using the latest version of your web browser or mobile app can prevent compatibility issues. Clearing your browser or app cache may resolve temporary glitches, and restarting your device often fixes minor software problems. If the issue persists, try accessing My Shop on another device or browser. Should the problem continue, please contact our Customer Support team with detailed information about your device type, operating system, app or browser version, and any relevant screenshots.

Login and account access issues can occur if your credentials are entered incorrectly, if your account needs verification, or if there are conflicts from being signed in on multiple devices. If you cannot sign in, double-check that your email or username and password are correct. Using the "Forgot Password" option allows you to reset your password securely. Some devices may require additional verification through email or SMS. If necessary, sign out from other devices and attempt to log in again. For persistent login issues, contact support with your account information so we can assist you promptly.

Device compatibility can also affect your experience. My Shop is designed to work on modern devices and browsers, including Chrome, Firefox, Edge, and Safari, with the latest operating system updates recommended. Older devices or outdated browsers may experience display problems or slow performance. For the best experience, ensure that your device and apps are updated regularly.

Your account security is very important. Always use a strong, unique password for your My Shop account, and enable two-factor authentication if available. Sign out when using shared devices and avoid accessing your account over public or unsecured networks. Keeping your devices updated and using recommended security practices will help protect your personal information.

If the troubleshooting steps above do not resolve your issue, our Customer Support team is ready to assist you. You can reach us via email at **support@myshop.com**, by phone at **+84 123 456 789**, or through the live chat feature available on the My Shop website and app. To help us assist you quickly, please provide your device type, operating system version, app or browser version, a description of the issue, and screenshots if possible.

By following these guidelines, you can ensure a smoother experience while using My Shop. Keeping your browser up to date, enabling notifications, and maintaining your account

settings and security measures will help prevent common technical issues and enhance your overall shopping experience.
